

NEUROBION

Merck Serono

Composition

Each coated tablet contains:

- Vitamin B₁ (thiamine disulphide) 100 mg
- Vitamin B₆ (pyridoxol hydrochloride) 200 mg
- Vitamin B₁₂ (cyanocobalamin) 200 mcg

The vitamins B₁, B₆ and B₁₂ are indispensable for a normal course of the nervous metabolism.

Neurobion coated tablets are prescribed in neuralgia, pain in the spinal region, migraine and circulation disorders. They are suitable to continue injection therapy started with Neurobion ampoules, to support injection therapy, for administration on days when no injections are given and to prevent recidivation.

Drug Interactions

Patients under L-dopa medication should not receive drugs with high amounts of vitamin B₆, as the latter leads to a reduction in the dopa effect; this applies also to Neurobion. Drugs should be kept in a safe place!.

Dosage and Administration

Unless otherwise prescribed by the physician 1 (-2) coated tablets of Neurobion 3 times daily- larger doses, if required according to medical instruction.

No signs of hypervitaminosis were noted. The coated tablets are swallowed unchewed with a little liquid with or after meals.

Packaging

t: 20 coated tablets.
