COMPOSITIONS:

Tablets: Each tablet contains Simethicone Powder eq. to Simethicone 40 mg or 60 mg.
Other ingredients: Calcium Phosphate, Maize Starch, Saccharin Sodium, Mannitol, Croscarmellose Sodium, Sorbitol, Povidone, Peppermint Flavour and Magnesium Stearate.
Oral Drops: Each 1 ml contains Simethicone 66.66 mg.
Other ingredients: Sorbitol Solution, Sodium Citrate, Citric Acid Monohydrate, Saccharin Sodium, Xanthan Gum, Microcrystalline Cellulose & CMC Sodium, Peppermint Flavour, Dill Seed Oil, Aniseed Oil Natural, Flavour and Purified Water.

CLINICAL PHARMACOLOGY:
Simethicone is non-toxic silicone-based surface-active substance and foam suppressant. It breaks down the gas bubbles which occur in flatulence and meteorism in a purely physical way by changing the surface tension. The gas which is liberated can then be absorbed and/or escape in a natural way. Simethicone acts exclusively on the surface of the gas bubbles and is not absorbed by the mucous membranes.

INDICATIONS:
FLATICON is indicated for the following:
• To relieve the painful symptoms of the excess gas in the gastrointestinal tract such as: flatulence, meteorism, aerophagy, gastrocardiac symptom complex, postoperative meteorism.
• To prepare for endoscopic, radiological or sonographic investigations of the stomach and/or bowel.

CONTRAINDICATIONS:
• Hypersensitivity to simethicone or any component of the formulation.
• FLATICON is contraindicated in ileus or obstructive gastrointestinal disorders.

ADVERSE REACTIONS:
Since simethicone is not absorbed in the gastrointestinal tract and is excreted unchanged, no side effects have been reported.

USES DURING PREGNANCY AND LACTATIONS:
Since simethicone is not absorbed there are not expected to be any risks during pregnancy and it is not expected to enter breast milk.

DOSAGE:
• Symptomatic treatment:
  - Adults:
    Chewed Tablets: 100 mg to 240 mg three or four times daily after meals and at bedtime or as directed by the physician.
    Oral drops: 0.6 ml four times a day, possibly with a little of water or fluid, after meals and at bedtime or as directed by the physician.
  - Children over 6 years:
    Chewed Tablets: 40 mg to 120 mg three or four times daily after meals and at bedtime or as directed by the physician.
    Oral drops: 0.3 ml four times a day possibly with a little of water or fluid, after meals and at bedtime or as directed by the physician.
  - Neonates and Infants:
    Oral drops: 0.3 ml four times daily with meals and at bedtime, or as directed by the physician.
• For diagnostic purposes:
  - Adults:
    Chewed Tablets: 2 tablets to be chewed 2-3 times, one day before the examination and 2 tablets in the morning of the day of examination.
    Oral drops: 1 ml to be taken three times, one day before the examination and 1 ml in the morning of the day of examination.
  - Neonates and Infants:
    Oral drops: 0.3 ml four times daily with meals and at bedtime, or as directed by the physician.

STORAGE:
Store at room temperature (15-25)°C.
Do not use the drug after the expiry date printed on the package.

**PRESENTATION:**

*Tablets:*

Packs contain (30) chewable tablets of FLATICON 40 mg or 60 mg.

Hospital packs of FLATICON chewable tablets 40 mg or 60 mg.

Oral Drops: 30 ml Bottle-dropper.
