COMPOSITION:

Syrup:
Each 5 ml contains Ambroxol Hydrochloride (BP) 15 mg.

CLINICAL PHARMACOLOGY:

RIABROXOL has been shown to increase respiratory tract secretion. It enhances pulmonary surfactant production and stimulates ciliary activity. Improvement of mucociliary clearance has been shown in clinical pharmacological studies. Enhancement of fluid secretion and mucociliary clearance facilitates expectoration and eases cough.

INDICATIONS:

RIABROXOL is indicated for secretolytic therapy in acute and chronic bronchopulmonary diseases associated with mucus secretion such as acute exacerbation of chronic bronchitis, bronchiectasis, asthmoid bronchitis and bronchial asthma.

CONTRAINDICATIONS:

Ambroxol Hydrochloride should not be used in patients known to be hypersensitive to Ambroxol or other components of the formulation.

DRUG INTERACTIONS:

Administration of Ambroxol together with antibiotics (amoxycillin, cefuroxime, erythromycin and doxycycline) may lead to a higher antibiotic concentration in the lung tissue. No clinically relevant unfavourable interaction with other medications has been reported.

PRECAUTIONS:

Ambroxol Hydrochloride should be taken at meal times.

ADVERSE REACTIONS:

Allergic reactions and mild gastro-intestinal side effects have been rarely reported.

USE DURING PREGNANCY AND LACTATION:

The usual precautions regarding the use of drugs during pregnancy, especially during the first trimester, should be observed. The drug is excreted in breast milk, but is not likely to affect the infant when therapeutic doses are used. In both cases, consult the doctor before use.

DOSAGE:

Syrup:
Adults and children over 12 years: 10 ml 3 times daily.
For the therapy of acute respiratory tract disorders and for the initial treatment of chronic condition up to 14 days, the dose may be increased to 20 ml 2 times daily.
Children 6-12 years: 5 ml 2-3 times daily.
Children 2-6 years: 2.5 ml 3 times daily.
Children under 2 years: 2.5 ml 2 times daily.

OVERDOSAGE:

In case of overdose, patients may suffer from increased salivation, retching, vomiting and drop in blood pressure.
In case of accidental or intentional extreme overdose, the cardiovascular system should be monitored and if necessary, symptomatic measures should be taken.

STORAGE:

Store at room temperature (15-25)°C.
Do not use the drug after the expiry date printed on the package.

PRESENTATIONS:

Syrup: 100 ml bottles.
